

FARMSTACK COMPANY PROFILE

ABOUT FARMSTACK

FarmStack AgriSolutions Ltd is a modern agricultural-infrastructure company building the operating system for food security in Nigeria and Africa.

We combine technology, commercial farming, processing, logistics, and retail distribution to create a seamless ecosystem that solves the biggest breakdowns across the agricultural value chain.

FarmStack's vision is simple but ambitious:

To rebuild Africa's agricultural backbone — from farm to consumer — through data, infrastructure, and scalable systems.

We operate through five integrated arms, each solving a core pain point in the agricultural economy.

OUR MISSION & VISION

Mission

To create a fully integrated agricultural ecosystem that empowers farmers, supports businesses, and delivers affordable, accessible food to millions of Africans.

Vision

To become Africa's largest agricultural infrastructure company — powering farms, feeding cities, and enabling prosperity across the value chain.

Our Core Values

- Structure over hustle – systems first, improvisation last.
 - Transparency – clarity in prices, operations, and communication.
 - Scalability – we build for millions, not dozens.
 - Innovation – using modern technology to solve ancient problems.
 - Impact – every solution must improve people's lives.
-

THE FARMSTACK ECOSYSTEM

FarmStack operates through five interconnected divisions:

A. FS FRESH (Consumer & Business Food Supply)

FarmStack Fresh is our fast-growing food distribution arm.

We deliver fresh produce, staples, proteins, and household food packs directly to:

- Restaurants
- Hotels
- School cafeterias
- Hostels
- Households
- Small retailers

What FS Fresh solves:

- Unstable market prices

- Poor quality control
- Stressful market sourcing
- Inconsistent supply
- Wastage from bad logistics

Our advantage:

- Direct farm sourcing & aggregation
- Clean packaging & consistent quality
- Technology-backed ordering system
- Combo food packs for households
- Transparent pricing
- Dual-city operations (Benin + Lagos)

FS Fresh is the first product FarmStack launched and is already generating revenue in multiple states.

B. FS GROW (Farmer Management & Farm Operations)

FS Grow manages the agricultural production side.

We help farmers and farm owners:

- Improve yield
- Reduce losses
- Adopt modern farming practices
- Get record-keeping, monitoring & farm insights

FS Grow manages farms owned by clients, including the upcoming Projects.

C. FS FORGE (Processing & Post-Harvest Infrastructure)

FS Forge develops:

- Mini processing plants
- Aggregation centers
- Cold chain units
- Storage & packaging hubs

Long-term: FS Forge becomes the backbone that converts raw produce into finished, market-ready products.

D. FS TECHNOLOGY (Digital Infrastructure)

FS Tech is the software layer powering FarmStack.

Products include:

- Ordering system for FS Fresh
- Vendor & supplier management tools
- Farmer dashboards
- Payment integrations
- Data analytics for yield + pricing
- Internal operational tools

Eventually: A full FarmStack Super App combining all ecosystem features.

E. FS ESTATES (Smart Agricultural Estates)

An innovation for the future.

FarmStack Estates builds smart agricultural estates where people can lease plots, and FarmStack handles:

- Infrastructure
- Farm management
- Monitoring
- Processing
- Market access

This arm solves:

- Land access problems
- Housing of agricultural investors
- Controlled farming environments
- Commercial-scale consistency

Coming soon in Edo State and Lagos.

TRACTION & CURRENT OPERATIONS

Despite being early-stage, FarmStack has:

Active Operations in

Benin

&

Lagos

Both branches are now revenue-generating.

First B2C and B2B Customers Acquired

Including households, students, hostels, and restaurants.

200-Acre Farm Management Deal in Motion

In partnership discussions with the Edo State Commissioner for Transport (personal project).

Government Engagement

Meetings with Special Advisers, Commissioners, and Ministries.

Technology Development

Website and waitlist system completed; web app in development.

Growing Team

Content team, marketing agents, project manager, and head of investor relations.

OUR COMPETITIVE ADVANTAGE

1. Multi-arm ecosystem (not just one product)

FarmStack is building infrastructure, not a single marketplace.

2. Strong government and private-sector channels

Access to land, partnerships, and early institutional relationships.

3. Young, hungry, execution-driven leadership

FarmStack is built by a high-energy team solving real problems from the ground up.

4. Dual-city launch

Immediate scalability across two key markets.

5. High-demand problem-solving approach

Food distribution + farm management = constant demand and scalable revenue.

6. LEADERSHIP

Founder & Managing Director

Glory Benjamin Uche — young entrepreneur building Africa's next-generation agricultural infrastructure company.

Head of Corporate & Investor Relations

Chisom — representing FarmStack in business deals, partnerships, and investor conversations.

Project Management Lead

Hallelujah — oversees operations, creatives, logistics, and cross-team executions.

Marketing & Content Team

Benin and Lagos-based teams driving waitlist acquisition and brand awareness.
